Postojna, 21.12.2010

Proizvajalec Sun Ta Toys – Malezija nam je posređoval naslednjo informacijo glede **puzel pena UNIKATOY**:

**Prevod:**

Za enkrat lahko zagotovimo da v proizvodnem procesu **NE UPORABLJAMO formamidov**. Kljub temu lahko pride do kemične reakcije med drugimi kemičnimi sestavinami. Za končni laboratorijski rezultat moramo počakati na določitev metode testiranja po katerem bodo naši proizvodi ustrezno preverjeni.

Do takrat vas prosimo za potrpljenje in prepričani smo da bomo dokazali neoporečnost naših proizvodov. Sprotno vas bomo obveščali o vseh ugotovitvah.

Sun Ta Toys Sdn. Bhd.

**Originalen dopis:**

To : UNIKA TTI  
Dear Peter,

Hi. Good day and thanks for your email.

Please note that at the moment what we can tell you is we definately **DO NOT USE** formamide during the production. However, as you know that might be different chemical substances in the products after chemical reaction. We shall wait for final test result from the lab after we have clear picture about the testing method and send our product for testing.

Please be patient, we are in the same boat now and for sure we would like to have clearer information and prove that our products are safe. We shall not fail to keep you inform with further details once available.

Thank you very much !

Best Regards,

**Sun Ta Toys Sdn. Bhd.**
